

The J.A. Gulick Window Company

Trusted and respected by architects, engineers, developers, and residential property owners across Western New York, the J.A. Gulick Window Company has not only been restoring and preserving but creating custom windows and doors in historic buildings for decades. Leading a team of experienced artisans in his restoration workshop located deep in the heart of Buffalo, John Gulick is renowned for his skilled craftsmanship in restoring windows, doors, and other significant features of this region's treasure trove of architectural gems. John and the craftspeople he trained have the required skills and the impeccable attention to detail that ensure the quality and integrity of the restoration and preservation process.

Since Buffalo is home to many of the most significant representations of late 19th and early 20th century American architecture, the J.A. Gulick Window Company understands that the rehabilitation of windows and doors is critical to retaining the character of older buildings. Windows and doors serve as distinctive visible external features and add unique and personalized elements to the interior design of these structures. The skills that are necessary for restoring and preserving historic window and doors involve more than craftsmanship, however. The Historic Preservation Education Foundation, a leading provider of preservation knowledge for architectural conservators and architects, tradespeople, building owners and those who care for and care about historic buildings, emphasizes that it is also necessary to be familiar with code compliance, energy conservation, maintenance, repair techniques, and technology. The J.A. Gulick Window Company is knowledgeable in all of these areas and can help preserve the

original windows, doors and other architectural features that with proper care and maintenance will last for decades to come.

The company extends its restoration and replication services to help maintain distinct historic buildings and homes throughout Western New York, Central New York, and the Finger Lakes Region.

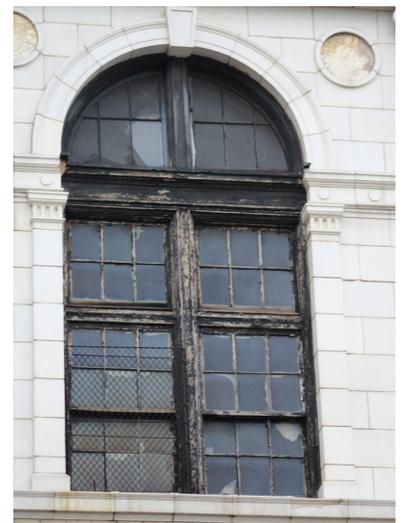

"Our historic restoration work dates back to the early 1970's. We have worked on projects from the glass dome of the main conservatory of the Buffalo and Erie County Botanical Gardens to the extensive restoration of Old Fort Niagara near Youngstown, New York. Our specialty is traditional craftsmanship and a passion and respect for classical construction methods."

—John A. Gulick, Founder,
J.A. Gulick Window Company

Our Portfolio

Preservation Buffalo Niagara provides leadership identifying, protecting and promoting the unique architecture and historic legacy of Western New York's communities and is committed to bringing resources and results that ensure that our historic places thrive for generations to come. A guardian of our architectural heritage, PBN honored the outstanding work of John Gulick with the coveted Preservation Craft Award to recognize him as one of the "most skilled craftspeople in Buffalo and Western New York," and acknowledge his company's most significant projects. Over the years, these projects involved many prominent buildings such as:

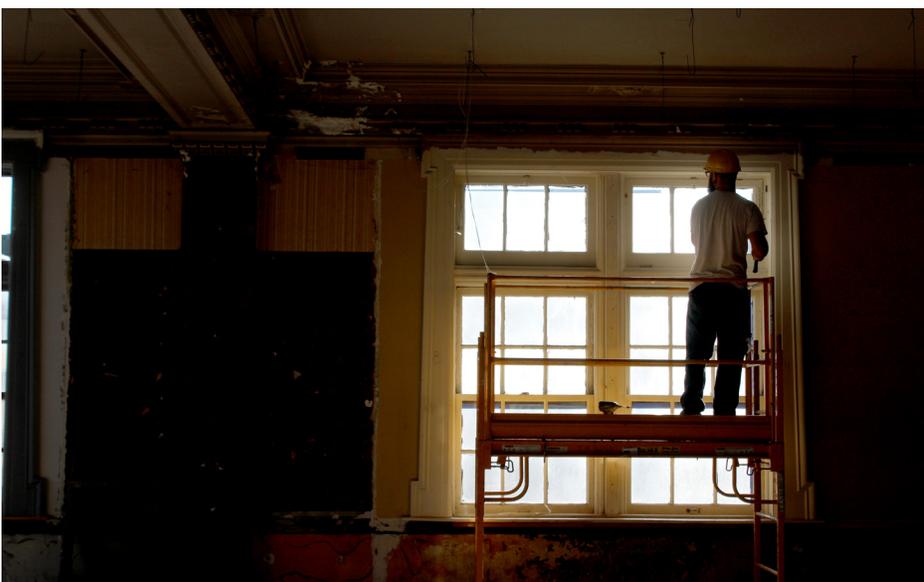

- Buffalo and Erie County Botanical Gardens, Glass Dome of Main Conservatory
- Frank Lloyd Wright's Graycliff, National Register of Historic Places
- George Eastman Museum, Mansion & Gardens, National Register of Historic Places
- Hayes Hall, School of Architecture and Planning, University at Buffalo, National Register of Historic Places
- Lamberton Conservatory, Highland Botanical Park
- Larkin Company Offices
- King Urban Life Center, Buffalo Landmark
- Louis Sullivan's Guaranty Building, National Register of Historic Places
- Old Fort Niagara, National Register of Historic Places
- Roycroft Power House, The Roycroft Campus, National Register of Historic Places
- Theodore Roosevelt Inaugural National Historic Site
- Trinity Episcopal Church, John La Farge's Rose Window
- Williamsville Water Mill Complex, National Register of Historic Places

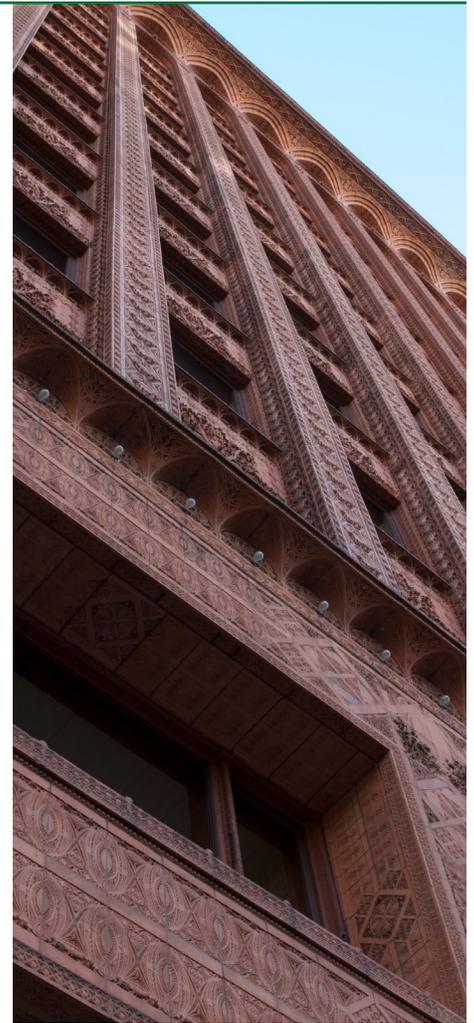

Before

After

Top: Former Alling & Cory Co. (North Division St., Buffalo) Restored the original wood windows with the addition of new storm panels.

Middle (left): Gateway Lofts (Jamestown) Completed an existing conditions windows report for the former Chautauqua Hardware Company.

Middle (right): Troop 1 Post (Franklin St., Buffalo) Restored the original wood double hung sash with the addition of new exterior wood storm windows.

Lower (left): Canisius College Chapel (Main St., Buffalo) Conducted an inspection of existing, deteriorating original windows and provided a proposed scope of work with budget pricing.

Lower (right): Old Fort Niagara (Youngstown) Contracted with the New York State Office of Parks and Historic Preservation for the restoration and recreation of the original, circa 1726, American chestnut wood windows in the French Castle and Provisions Storehouse buildings.

“With our stewardship of the Guaranty Building, we committed to the most authentic, highest quality restoration possible for one of the world’s iconic structures. For this reason, we choose to work with John Gulick on our massive window restoration project. The unparalleled excellence of John and his team and their masterful craftsmanship certainly helped us to achieve our goal.”

–Paul Pellegrino, Director of Facilities Management and Records Administration, Hodgson Russ, LLP
